

# Surfers Paradise Northern Gateway

*The iconic form of a rose has driven the design for this space, a metaphor for the potential blossoming new growth of the site. It also represents a floral entrance into the city.*

LandPartners was commissioned to produce concept design options for the northern gateway into Surfers Paradise. The designs proposed stem from a variety of philosophical approaches to address the unique built form, complex infrastructure and cultural landscape of Surfers Paradise.

Concepts celebrate the opportunity to produce an experience over a journey, mitigating the scale of the tall buildings, while providing variety of egalitarian space.
