

# Villanova College

*The landscape design intends to capture and build upon Villanova College's sense of place. Landscape spaces will allow the students and school community to engage, reflect, socialise and circulate.*

VILLANOVA COLLEGE is a private boys' school in Coorparoo, Brisbane. In collaboration with Fairweather Proberts Architects, LandPartners' commission includes the design of the landscape around a new central building in the Senior School, and a new playground area for the relocated Junior School. Landscape provides variety of spaces and stitches the school campus together.
